

Executive Summary

The Pokédex app is an iOS exclusive app that allows users to access information on various Pokémon species and their characteristics. The app is designed to be user-friendly, interactive, and informative, providing an engaging experience for both new and experienced Pokémon trainers and enthusiasts. With a comprehensive database of currently only 200 Pokémon species, the app offers detailed information on each Pokémon, including their height, weight, base experience, and order, among others. Users can search for specific Pokémon by name. Users can also see Pokémon in 3D. The app also includes a “Favorites” feature, which allows users to mark their favorites Pokémon for quick access. The Pokédex app is designed for Pokémon enthusiasts of all ages and experience levels, providing a valuable resource for learning about the vast world of Pokémon. With its user-friendly interface, comprehensive database, and social features, the app is sure to become a must-have for any aspiring Pokémon trainer.
